

ABOUT US

Green Clean Solar LLC is committed to managing the waste generated during the construction phase of commercial solar sites across the United States. With a focus on landfill diversion, solar panel recycling, and the latest recycling technologies, we aim to foster a diverse workforce and promote sustainable practices.

CONSULTING SERVICE OVERVIEW

We offer a specialized consultation service tailored to the renewable energy sector, providing comprehensive reports and case studies that support your pitches and decision making processes.

Our services include the provision of Consultation Reports and Case Studies that summarize the scope of research, key research methods, findings, and recommendations, tailored to the needs of each client

ESG REPORTING

ESG REPORT DELIVERABLES

Our Report will highlight key metrics and data points of the project that include the following:

- Environmental & Sustainability Insights: Deep-dive data on carbon footprint reduction, resource efficiency, and sustainable material lifecycle management across all solar operations.
- Waste Tracking & Landfill Diversion: Precise metrics quantifying total tonnage collected, materials diverted from landfills, and direct progress toward zero-waste benchmarks.
- Solar Panel & Material Recovery: Exact breakdown of recycled photovoltaic components—including glass, aluminum frames, silicon, and metals—diverted from municipal waste streams.
- Local Partnership & Social Impact: Verification of local workforce engagement and collaborations with certified regional offtakers to empower local clean economies.
- End-of-Life Strategy Compliance: Full documentation ensuring compliance with federal, state, and local environmental standards for decommissioned assets.
